PROFESSIONAL SUMMARY

Detail-oriented Data Scientist with 2.7 years of experience in **data analytics, NLP, and AI-driven solutions**. Skilled in **Python, SQL, Power BI, and LLMs**, with a proven track record of delivering **recommendation systems** and **AI chatbots** that improved decision-making and operational efficiency. Strong problem-solving and analytical mindset, with the ability to translate business problems into scalable AI solutions.

Core Skills

- **ML & AI:** Supervised/Unsupervised Learning, NLP, Recommendation Systems
- **Generative AI:** BioGPT, Basic RAG
- **Programming:** Python (pandas, numpy, scikit-learn, PyTorch, TensorFlow), SQL
- **Data Engineering:** ETL, Feature Engineering, Pipelines
- **Visualization:** Power BI, Matplotlib, Seaborn
- **MLOps:** Docker, Git/GitHub, PostgreSQL, CI/CD
- **Cloud:** AWS

Professional Experience

Data Scientist

Maren Solutions | Hyderabad, India

Nov 2021 – May 2024

- Designed and deployed **AI/ML solutions** for healthcare, and HR automation.
- Built **end-to-end pipelines** using Python + SQL for structured/unstructured datasets.
- Collaborated with product, operations, and clinical teams to design AI solutions in healthcare.
- Built **data-driven dashboards** in Power BI for business insights on operations and patient engagement.
- Designed SQL pipelines to extract, clean, and transform data from **PostgreSQL and SAP sources** for analytics.
- Partnered with cross-functional teams (Data Engineering, HR, IT) to integrate ML APIs into business systems.
- Conducted model validation, monitored KPIs, and optimized algorithms to ensure scalable adoption.

Projects

Project 1: AI-Powered Recommendation Engine

- Developed a **hybrid recommendation system** (Collaborative + Content-based) to suggest doctors based on **patient symptoms, history, and location**.
- Built **SQL-based interaction tables** from appointment logs, search clicks, and ratings.
- Engineered **TF-IDF + SVD embeddings** on doctor profiles and symptoms to improve semantic matching.
- Evaluated models using **Precision@5** and achieving a **15% uplift in booking conversions**.
- Integrated recommendations into a **REST API** consumed by the patient-facing app.

Impact: Improved patient-doctor matching by **32%**; reduced average consultation wait times by **25%**.

Project 2: AI-Powered Healthcare Chatbot (NLP + BioGPT + RAG)

- Designed an **AI chatbot** for a healthcare messaging & campaign system (appointment reminders, teleconsultation notifications, donor campaigns).
- Implemented **RAG pipeline** with PostgreSQL logs + vector search for faster FAQ and conversation retrieval.
- Fine-tuned **BioGPT** on medical & campaign-specific queries for contextual accuracy.
- Automated escalation detection → flagged failed reminders and non-responses for **Ops team intervention**.

- Integrated chatbot logs into **Power BI dashboards**, providing stakeholders near real-time insights on **delivery, failures, and patient engagement**.

Impact: Reduced manual follow-up effort by **35%** and improved campaign efficiency.

Education

B.Sc. (Statistics), Osmania University – Hyderabad

Graduated: 2020 | GPA: 8.5

Certifications

- Data Science Course – UTM (2020)
- Microsoft Certified: Data Scientist Associate (Power BI, SQL, Python) – (2021)

Soft Skills

- Strong Analytical Thinking & Problem-Solving
- Effective Communication & Documentation
- Business Acumen & Stakeholder Engagement
- Process Optimization Mindset
